

## **Medication**

At **Abbotswood Day Nursery** we promote the good health of children attending nursery and take necessary steps to prevent the spread of infection (see sickness and illness policy). If a child requires medication we will obtain information about the child's needs for this and will ensure this information is kept up to date.

We follow strict guidelines when dealing with medication of any kind in the nursery and these are set out below.

### **Medication prescribed by a doctor, dentist, nurse or pharmacist**

*(Medicines containing aspirin will only be given if prescribed by a doctor)*

- Prescription medicine will only be given when prescribed by the above and for the person named on the bottle/packaging for the dosage stated
- Medicines must be in their original containers with their instructions printed in English
- Those with parental responsibility for any child requiring prescription medication should hand over the medication to the most appropriate member of staff who will then note the details of the administration on the appropriate form and another member of staff will check these details
- Those with parental responsibility must complete a medication form on EyLog for the administration of each and every medication. However, we will accept written permission once for a whole course of medication or for the ongoing use of a particular medication under the following circumstances:
  1. The written permission is only acceptable for that brand name of medication and cannot be used for similar types of medication, e.g. if the course of antibiotics changes, a new form will need to be completed
  2. The dosage on the written permission is the only dosage that will be administered. We will not give a different dose unless a new form is completed
  3. Parents must notify us IMMEDIATELY if the child's circumstances change, e.g. a dose has been given at home, or a change in strength/dose needs to be given.
- The nursery will not administer a dosage that exceeds the recommended dose on the instructions unless accompanied by written instructions from a relevant health professional such as a letter from a doctor or dentist
- The parent must be asked when the child has last been given the medication before coming to nursery; and this must be recorded on the medication form. Similarly, when the child is picked up, the parent or guardian must be given precise details of the times and dosage given throughout the day. This must be recorded on the EyLog medication form and the parent's signature must be obtained at both times
- At the time of administering the medicine, a senior member of staff will ask the child to take the medicine, or offer it in a manner acceptable to the child at the prescribed time and in the prescribed form.
- If the child refuses to take the appropriate medication, then a note will be made on the form

- Where medication is “essential” or may have side effects, discussion with the parent will take place to establish the appropriate response.

**Non-prescription medication (*these will not usually be administered*)**

- The nursery will not administer any non-prescription medication containing aspirin
- The nursery will only administer non-prescription medication for a short initial period, dependant on the medication or the condition of the child. After this time medical attention should be sought
- If the nursery feels the child would benefit from medical attention rather than non-prescription medication, we reserve the right to refuse nursery care until the child is seen by a medical practitioner
- If a child needs liquid paracetamol or similar medication during their time at nursery, such medication will be treated as prescription medication with the nursery providing one specific type of medication should parents wish to use this
- On registration, parents will be asked if they would like to give consent to their child being given a specific type of liquid paracetamol or anti-histamine in particular circumstances such as an increase in the child’s temperature or a wasp/bee sting. Parents will be called and permission requested if we feel we need to administer liquid paracetamol. A medication form on EyLog will be completed and parent signature required to say it has been administered. Parents must be on the way to collect if liquid paracetamol is administered.
- An emergency nursery supply of fever relief (e.g. Calpol) and anti-histamines (e.g. Piriton) will be stored on site. This will be checked at regular intervals by the designated trained first aider to make sure that it complies with any instructions for storage and is still in date
- If a child does exhibit the symptoms for which consent has been given to give non-prescription medication during the day, the nursery will make every attempt to contact the child’s parents. Where parents cannot be contacted then the nursery manager will take the decision as to whether the child is safe to have this medication based on the time the child has been in the nursery, the circumstances surrounding the need for this medication and the medical history of the child on their registration form.
- Giving non-prescription medication will be a last resort and the nursery staff will use other methods first to try and alleviate the symptoms (where appropriate). The child will be closely monitored until the parents collect the child
- For any non-prescription cream for skin conditions e.g. Sudocrem, prior written permission must be obtained from the parent on the registration form. Nursery will supply sudocrem and metanium. If parents use any other creams this will be up to the parents to supply.
- If any child is brought to the nursery in a condition in which he/she may require medication sometime during the day, the manager will decide if the child is fit to be left at the nursery. If the child is staying, the parent must be asked if any kind of medication

has already been given, at what time and in what dosage and this must be stated on the medication form

- As with any kind of medication, staff will ensure that the parent is informed of any non-prescription medicines given to the child whilst at the nursery, together with the times and dosage given
- The nursery DOES NOT administer any medication unless prior written consent is given for each and every medicine.
- We understand that young children under the age of 2 will often suffer with teething and this can bring on temperatures and other symptoms. Therefore acceptances will be made for children who have received inoculations or if they are suffering as a result of teething. However if they require one to one care or their temperature remains, parents will be contacted.

### **Injections, pessaries, suppositories**

As the administration of injections, pessaries and suppositories represents intrusive nursing, we will not administer these without appropriate medical training for every member of staff caring for this child. This training is specific for every child and not generic. The nursery will do all it can to make any reasonable adjustments including working with parents and other professionals to arrange for appropriate health officials to train staff in administering the medication.

### **Staff medication**

All nursery staff have a responsibility to work with children only where they are fit to do so. Staff must not work with children where they are infectious or too unwell to meet children's needs. This includes circumstances where any medication taken affects their ability to care for children, for example, where it makes a person drowsy.

If any staff member believes that their condition, including any condition caused by taking medication, is affecting their ability they must inform their line manager and seek medical advice. The nursery manager or person in charge will decide if a staff member is fit to work, including circumstances where other staff members notice changes in behaviour suggesting a person may be under the influence of medication. This decision will include any medical advice obtained by the individual or from an occupational health assessment.

Where staff may occasionally or regularly need medication, any such medication must be kept in the person's locker/separate locked container in the staff room or nursery room where staff may need easy access to the medication such as an asthma inhaler. In all cases it must be stored out of reach of the children. It must not be kept in the first aid box and should be labelled with the name of the member of staff.

### **Storage**

All medication for children must have the child's name clearly written on the original container and kept in a closed box, which is out of reach of all children. Emergency medication, such as

Abbotswood Day Nursery Ltd, Cupernham Lane, Romsey, SO51 7LF  
Tel: Main office: 01794 523686 Email: [office@abbotswooddawnursery.co.uk](mailto:office@abbotswooddawnursery.co.uk)  
[www.abbotswooddawnursery.co.uk](http://www.abbotswooddawnursery.co.uk)

inhalers and auto-injectors, will be within easy reach of staff in case of an immediate need, but will remain out of children's reach. Any antibiotics requiring refrigeration must be kept in a fridge inaccessible to children.

All medications must be in their original containers, labels must be legible and not tampered with or they will not be given. All prescription medications should have the pharmacist's details and notes attached to show the dosage needed and the date the prescription was issued. This will all be checked, along with expiry dates, before staff agree to administer medication.
